

How to Obtain Free Copies of the *Student Friendly Quantum Field Theory Texts*

For those in the USA, Canada, Europe, UK, and Australia (for other locations, see further below)

To get free copies of one or more of the *Student Friendly QFT* books, just do the following.

1. Request your school library to order whichever books you want. If they already have Vol. 1, it is no doubt an out of date version, so ask them to get the latest (Sept 2022) revision.
2. Get a copy of the completed order from the library, showing they have ordered the books, and specifically, which books.
3. Email me at rdklauber###quantumfieldtheory.info (change ### to @ sign.) and include
 - a copy of the completed order,
 - your full name
 - your full address
 - your phone number (needed for the delivery service)

I will then have the same book(s) your library ordered sent directly from the printer to you.

Information to give the library

Student Friendly Quantum Field Theory Volume 1: Basic Principles and Quantum Electrodynamics (2nd edition)

ISBN 978-0-9845139-4-9 (2013)

Solutions to Problems for Student Friendly Quantum Field Theory Volume 1

ISBN 978-0-9845139-6-3 (2014)

Student Friendly Quantum Field Theory Volume 2: The Standard Model

ISBN 978-0-9845139-7-0 (2021)

Solutions to Problems for Student Friendly Quantum Field Theory Volume 2

ISBN 978-0-9845139-9-4 (2021)

Author: Robert D. Klauber

Publisher: Sandtrove Press

For those locations OTHER THAN the USA, Canada, Europe, UK, and Australia

Getting free copies of the books may entail you covering mailing costs, which can be expensive. Please email me, the author, (see email address above in step #3) to see what might be worked out.

Regrettably, for somewhat complicated reasons, this offer is not available in India and certain other countries.
